

SECRET

1 February 1955

MEMORANDUM FOR: [REDACTED]

50X1

SUBJECT : Balloon Overflight--
Stereo Camera Operation

1. [REDACTED] of TSS/WAD called to tell us that the present plans are for dry runs to be made the latter part of April 1955. Both [REDACTED] and the Admiral are working on an agreement with the Navy to conduct the tests. He just wanted us to know that the project was still very much alive. [REDACTED] is leaving town today and will not be back until Tuesday night, 8 February.

2. He asked if we would send him the name of the man who is to handle the camera project. He also passed on the information that all equipment will have to be able to pass through the 25" diameter hatch. This means that the gondola will have to be modified accordingly, and hence, it is most important that they get information on the camera mounts as soon as possible.
